

## Approved Oils, MACK mDRIVE Transmissions

### Transmission Oil Type/Quality

 **CAUTION**

Only use MACK-approved synthetic transmission oil in the mDRIVE transmission. Using non-approved transmission oil can result in damage to transmission components.

 **CAUTION**

Drained mDRIVE synthetic oil must NEVER BE REUSED and must be replaced along with the transmission oil filter when the transmission oil is changed.

MACK mDRIVE transmissions are factory filled with oil according to VOLVO STD 1273,18 (Transmission Oil 97318). This oil type allows 800 000 Km (500,000 mi) oil drain intervals in the "D" and "E" Design Level mDRIVE transmissions in on the road long haul applications with max 80,000 lbs GCW. Oils meeting VOLVO STD 1273,19 (Transmission Oil 97319) can also be used for this purpose.

For service fill, please use MACK mDRIVE Transmission Fluid 75W-80 available in 5 USG or 4 x 1 USG containers.

Should this oil not be available, please use the following approved oils:
